Thin Solid Films 283 (1996) 253–256

thin solid films

Subject Index of Volume 283

Adhesion
apparent interface toughness of substrate and coating couples from indentation tests, 151
the effect of residual stress on the adhesion of PECVD-coated aluminum oxide film on glass, 171
Alloys
Ru-promoted alloying of Au and Cu ultrathin films: photoemission studies, 209
effect of light soaking on the electrical properties of the $Ge_{0.20}Te_{0.75}Bi_{0.05}$ glass system, 239
indium–copper multilayer composites for fluxless oxidation-free bonding, 243
Aluminium
argon entrapment in magnetron-sputtered Al alloy films, 57
metal–oxygen–carbon interaction in the poly(p-phenylene vinylene)–aluminum system: a study by analytical transmission electron microscopy and X-ray photoelectron spectroscopy, 135
process control of RF plasma assisted surface cleaning, 158
bilayer structure of Pd-Al_2O_3 for UV vidicon applications, 235
Aluminium nitride
metastable single-phase polycrystalline aluminium oxynitride films grown by MSIP: constitution and structure, 37
Aluminium oxide
metastable single-phase polycrystalline aluminium oxynitride films grown by MSIP: constitution and structure, 37
nonlinear optical properties (SHG, THG) of *N*-(4-nitrophenyl)-*L*-prolinol doped alumina film prepared by a sol–gel process, 221
bilayer structure of Pd-Al_2O_3 for UV vidicon applications, 235
Aluminium oxynitride
metastable single-phase polycrystalline aluminium oxynitride films grown by MSIP: constitution and structure, 37
Aluminum oxide
formation of MgO films by ultrasonic spray pyrolysis from β-diketonate, 17
the effect of residual stress on the adhesion of PECVD-coated aluminum oxide film on glass, 171
Amorphous materials
comparative study of properties of a-Si:H films produced by hot-filament CVD, glow discharge CVD and their hybrid version, 49
room-temperature deposition of a-SiC:H thin films by ion-assisted plasma-enhanced CVD, 109
optical absorption of amorphous hydrogenated carbon thin films, 196
nonlinear optical properties (SHG, THG) of *N*-(4-nitrophenyl)-*L*-prolinol doped alumina film prepared by a sol–gel process, 221
effect of light soaking on the electrical properties of the $Ge_{0.20}Te_{0.75}Bi_{0.05}$ glass system, 239
Amorphous silicon
determination of recombination and photogeneration parameters of a-Si:H using photoconductivity measurements, 75
Annealing
study of defects in thin titanium films by positron annihilation spectroscopy, 26
the study of lead sulfide films. The behaviour at low-temperature thermal treatment, 119
Atomic force microscopy (AFM)
surface roughness of $PbZr_xTi_{1-x}O_3$ thin films produced by pulsed laser ablation-deposition, 45
Auger electron spectroscopy
metastable single-phase polycrystalline aluminium oxynitride films grown by MSIP: constitution and structure, 37

Bacteriorhodopsin
dehydration effects on D96N bacteriorhodopsin films, 1
Biomaterials
dehydration effects on D96N bacteriorhodopsin films, 1
Bismuth
synthesis and optical properties of highly *c*-axis oriented $Bi_4Ti_3O_{12}$ thin films by sol–gel processing, 81

Carbon
studies of diamond-like and nitrogen-containing diamond-like carbon using laser Raman spectroscopy, 145
optical absorption of amorphous hydrogenated carbon thin films, 196
Chemical vapor deposition
formation of MgO films by ultrasonic spray pyrolysis from β-diketonate, 17
studies of diamond-like and nitrogen-containing diamond-like carbon using laser Raman spectroscopy, 145
Chemical vapour deposition
on exciton luminescence of ZnO/Al_2O_3 epitaxial thin films, 5
transparent contacts to β-SiC for optical electronic device applications, 8
comparative study of properties of a-Si:H films produced by hot-filament CVD, glow discharge CVD and their hybrid version, 49
room-temperature deposition of a-SiC:H thin films by ion-assisted plasma-enhanced CVD, 109
comparative studies of TiN and $Ti_{1-x}Al_xN$ by plasma-assisted chemical vapor deposition using a $TiCl_4/AlCl_3/N_2/H_2/Ar$ gas mixture, 165
Coatings
metastable single-phase polycrystalline aluminium oxynitride films grown by MSIP: constitution and structure, 37
wear improvement and local structure in nickel–titanium coatings produced by reactive ion sputtering, 67
XRD, XPS and SIMS investigations on electrodeposited nickel–phosphorous alloy coatings, 140
apparent interface toughness of substrate and coating couples from indentation tests, 151
comparative studies of TiN and $Ti_{1-x}Al_xN$ by plasma-assisted chemical vapor deposition using a $TiCl_4/AlCl_3/N_2/H_2/Ar$ gas mixture, 165
Conductivity
optical absorption of amorphous hydrogenated carbon thin films, 196
effect of light soaking on the electrical properties of the $Ge_{0.20}Te_{0.75}Bi_{0.05}$ glass system, 239

Elsevier Science S.A.

Contacts
transparent contacts to β-SiC for optical electronic device applications, 8
Copper
low cycle fatigue of thin copper foils, 175
Ru-promoted alloying of Au and Cu ultrathin films: photoemission studies, 209
indium–copper multilayer composites for fluxless oxidation-free bonding, 243
Crystallization
photoelectrochemical properties of TiO_2 coating films prepared using different solvents by the sol–gel method, 188

D96N mutant
dehydration effects on D96N bacteriorhodopsin films, 1
Deposition process
surface roughness of $PbZr_xTi_{1-x}O_3$ thin films produced by pulsed laser ablation-deposition, 45
ion-assisted deposition of C–N and Si–C–N films, 90
indium–copper multilayer composites for fluxless oxidation-free bonding, 243
Depth profiling
XRD, XPS and SIMS investigations on electrodeposited nickel–phosphorous alloy coatings, 140
Diamond
studies of diamond-like and nitrogen-containing diamond-like carbon using laser Raman spectroscopy, 145

Elastic properties
influence of substrates on the elastic reaction of films for the microindentation tests, 12
Electrochemistry
photoelectrochemical properties of TiO_2 coating films prepared using different solvents by the sol–gel method, 188
Electron energy loss spectrosocpy
metal–oxygen–carbon interaction in the poly(p-phenylene vinylene)–aluminum system: a study by analytical transmission electron microscopy and X-ray photoelectron spectroscopy, 135
Electron microscopy
low cycle fatigue of thin copper foils, 175
Ellipsometry
process control of RF plasma assisted surface cleaning, 158
characterization of thin buffer layers for strongly mismatched heteroepitaxy, 226
Epitaxy
on exciton luminescence of ZnO/Al_2O_3 epitaxial thin films, 5
characterization of thin buffer layers for strongly mismatched heteroepitaxy, 226
Evaporation
a low energy ion beam assisted deposition technique for realizing iso-type SiGe/Si hetero-interface diodes, 182

Fluorescence
structural changes in molecular assemblies in Langmuir–Blodgett films induced by ionizing radiation, 124
Fluorosilicate glass
dielectric constant and stability of fluorine doped PECVD silicon oxide thin films, 30
Fourier transform infrared spectroscopy
photo-oxidation in the photobleaching process of a non-linear optical polymer, 247

Gelatin films
dehydration effects on D96N bacteriorhodopsin films, 1
Glow discharge
process control of RF plasma assisted surface cleaning, 158
Glow discharge optical spectroscopy
NiTi shape memory alloy thin films: composition control using optical emission spectroscopy, 61
Gold
Ru-promoted alloying of Au and Cu ultrathin films: photoemission studies, 209
Growth mechanism
ion-assisted deposition of C–N and Si–C–N films, 90

Hardness
apparent interface toughness of substrate and coating couples from indentation tests, 151
comparative studies of TiN and $Ti_{1-x}Al_xN$ by plasma-assisted chemical vapor deposition using a $TiCl_4/AlCl_3/N_2/H_2/Ar$ gas mixture, 165
Heterostructures
a low energy ion beam assisted deposition technique for realizing iso-type SiGe/Si hetero-interface diodes, 182
characterization of thin buffer layers for strongly mismatched heteroepitaxy, 226

Indium
indium–copper multilayer composites for fluxless oxidation-free bonding, 243
Interfaces
apparent interface toughness of substrate and coating couples from indentation tests, 151
Intermetal dielectrics
dielectric constant and stability of fluorine doped PECVD silicon oxide thin films, 30
Ion bombardment
properties of TiO_2 films prepared by ion-assisted deposition using a gridless end-Hall ion source, 84
ion-assisted deposition of C–N and Si–C–N films, 90
a low energy ion beam assisted deposition technique for realizing iso-type SiGe/Si hetero-interface diodes, 182
Ion plating
metastable single-phase polycrystalline aluminium oxynitride films grown by MSIP: constitution and structure, 37

Langmuir–Blodgett films
structural changes in molecular assemblies in Langmuir–Blodgett films induced by ionizing radiation, 124
Laser ablation
surface roughness of $PbZr_xTi_{1-x}O_3$ thin films produced by pulsed laser ablation-deposition, 45
Lead sulfide
the study of lead sulfide films. The behaviour at low-temperature thermal treatment, 119
Luminescence
on exciton luminescence of ZnO/Al_2O_3 epitaxial thin films, 5
blue emitting ACPEL devices based upon ZnS:Tm, Li, 204
optical transitions in germanium dioxide, 230

Magnesium oxide
formation of MgO films by ultrasonic spray pyrolysis from β-diketonate, 17
Metallization
argon entrapment in magnetron-sputtered Al alloy films, 57
Multilayers
dehydration effects on D96N bacteriorhodopsin films, 1

Nickel
NiTi shape memory alloy thin films: composition control using optical emission spectroscopy, 61

Nitrogen
studies of diamond-like and nitrogen-containing diamond-like carbon using laser Raman spectroscopy, 145

Optical coatings
properties of TiO_2 films prepared by ion-assisted deposition using a gridless end-Hall ion source, 84
Optical properties
transparent contacts to β-SiC for optical electronic device applications, 8
determination of recombination and photogeneration parameters of a-Si:H using photoconductivity measurements, 75
synthesis and optical properties of highly *c*-axis oriented $Bi_4Ti_3O_{12}$ thin films by sol–gel processing, 81
properties of TiO_2 films prepared by ion-assisted deposition using a gridless end-Hall ion source, 84
optical absorption of amorphous hydrogenated carbon thin films, 196
blue emitting ACPEL devices based upon ZnS:Tm, Li, 204
nonlinear optical properties (SHG, THG) of *N*-(4-nitrophenyl)-*L*-prolinol doped alumina film prepared by a sol–gel process, 221
effect of light soaking on the electrical properties of the $Ge_{0.20}Te_{0.75}Bi_{0.05}$ glass system, 239
photo-oxidation in the photobleaching process of a non-linear optical polymer, 247
Optical spectroscopy
dehydration effects on D96N bacteriorhodopsin films, 1
optical transitions in germanium dioxide, 230
photo-oxidation in the photobleaching process of a non-linear optical polymer, 247
Organic substances
polymorphism in powders and thin films of lithium phthalocyanine. An X-Ray, optical and electron spin resonance study, 97
Oxidation
comparative studies of TiN and $Ti_{1-x}Al_xN$ by plasma-assisted chemical vapor deposition using a $TiCl_4/AlCl_3/N_2/H_2/Ar$ gas mixture, 165
Oxides
optical transitions in germanium dioxide, 230

Palladium
bilayer structure of Pd-Al_2O_3 for UV vidicon applications, 235
Phosphorus
blue emitting ACPEL devices based upon ZnS:Tm, Li, 204
Photoconductivity
determination of recombination and photogeneration parameters of a-Si:H using photoconductivity measurements, 75
Photon emission
Ru-promoted alloying of Au and Cu ultrathin films: photoemission studies, 209
optical transitions in germanium dioxide, 230
Plasma processing and deposition
influence of substrates on the elastic reaction of films for the microindentation tests, 12
argon entrapment in magnetron-sputtered Al alloy films, 57
room-temperature deposition of a-SiC:H thin films by ion-assisted plasma-enhanced CVD, 109
process control of RF plasma assisted surface cleaning, 158
comparative studies of TiN and $Ti_{1-x}Al_xN$ by plasma-assisted chemical vapor deposition using a $TiCl_4/AlCl_3/N_2/H_2/Ar$ gas mixture, 165
the effect of residual stress on the adhesion of PECVD-coated aluminum oxide film on glass, 171
Polymers
metal–oxygen–carbon interaction in the poly(p-phenylene vinylene)–aluminum system: a study by analytical transmission electron microscopy and X-ray photoelectron spectroscopy, 135
photo-oxidation in the photobleaching process of a non-linear optical polymer, 247
Positron spectroscopy
study of defects in thin titanium films by positron annihilation spectroscopy, 26

Quantum effects
synthesis and optical properties of highly *c*-axis oriented $Bi_4Ti_3O_{12}$ thin films by sol–gel processing, 81

Radiation damage
structural changes in molecular assemblies in Langmuir–Blodgett films induced by ionizing radiation, 124
Raman scattering
comparative study of properties of a-Si:H films produced by hot-filament CVD, glow discharge CVD and their hybrid version, 49
Rutherford backscattering spectroscopy
surface and interface studies of titanium silicide formation, 130

Scanning electron microscopy (SEM)
characterization of thin buffer layers for strongly mismatched heteroepitaxy, 226
Secondary ion mass spectrometry
XRD, XPS and SIMS investigations on electrodeposited nickel–phosphorous alloy coatings, 140
Secondary ion mass spectrometry (SIMS)
surface and interface studies of titanium silicide formation, 130
Second harmonic
nonlinear optical properties (SHG, THG) of *N*-(4-nitrophenyl)-*L*-prolinol doped alumina film prepared by a sol–gel process, 221
Semiconductors
determination of recombination and photogeneration parameters of a-Si:H using photoconductivity measurements, 75
polymorphism in powders and thin films of lithium phthalocyanine. An X-Ray, optical and electron spin resonance study, 97
a low energy ion beam assisted deposition technique for realizing iso-type SiGe/Si hetero-interface diodes, 182
photoelectrochemical properties of TiO_2 coating films prepared using different solvents by the sol–gel method, 188
Silicides
surface and interface studies of titanium silicide formation, 130
Silicon
comparative study of properties of a-Si:H films produced by hot-filament CVD, glow discharge CVD and their hybrid version, 49
Silicon carbide
transparent contacts to β-SiC for optical electronic device applications, 8
ion-assisted deposition of C–N and Si–C–N films, 90
room-temperature deposition of a-SiC:H thin films by ion-assisted plasma-enhanced CVD, 109
Silicon nitride
ion-assisted deposition of C–N and Si–C–N films, 90
Silicon oxide
influence of substrates on the elastic reaction of films for the microindentation tests, 12
Sol–gel
synthesis and optical properties of highly *c*-axis oriented $Bi_4Ti_3O_{12}$ thin films by sol–gel processing, 81
Sputtering
argon entrapment in magnetron-sputtered Al alloy films, 57
NiTi shape memory alloy thin films: composition control using optical emission spectroscopy, 61
wear improvement and local structure in nickel–titanium coatings produced by reactive ion sputtering, 67
Stress
the effect of residual stress on the adhesion of PECVD-coated aluminum oxide film on glass, 171

Structural properties
polymorphism in powders and thin films of lithium phthalocyanine. An X-Ray, optical and electron spin resonance study, 97
low cycle fatigue of thin copper foils, 175
Surface morphology
structural changes in molecular assemblies in Langmuir–Blodgett films induced by ionizing radiation, 124
Surface roughness
surface roughness of $PbZr_xTi_{1-x}O_3$ thin films produced by pulsed laser ablation-deposition, 45
Surface stress
properties of TiO_2 films prepared by ion-assisted deposition using a gridless end-Hall ion source, 84

Thermal desorption
the study of lead sulfide films. The behaviour at low-temperature thermal treatment, 119
Titanium
study of defects in thin titanium films by positron annihilation spectroscopy, 26
NiTi shape memory alloy thin films: composition control using optical emission spectroscopy, 61
surface and interface studies of titanium silicide formation, 130
Titanium nitride
wear improvement and local structure in nickel–titanium coatings produced by reactive ion sputtering, 67
Titanium oxide
photoelectrochemical properties of TiO_2 coating films prepared using different solvents by the sol–gel method, 188
Transmission electron microscopy
low cycle fatigue of thin copper foils, 175
Triethoxyfluorosilane
dielectric constant and stability of fluorine doped PECVD silicon oxide thin films, 30

Water
dehydration effects on D96N bacteriorhodopsin films, 1

X-ray absorption
wear improvement and local structure in nickel–titanium coatings produced by reactive ion sputtering, 67
X-ray diffraction
the study of lead sulfide films. The behaviour at low-temperature thermal treatment, 119
blue emitting ACPEL devices based upon ZnS:Tm, Li, 204
X-ray photoelectron spectroscopy
metal–oxygen–carbon interaction in the poly(p-phenylene vinylene)–aluminum system: a study by analytical transmission electron microscopy and X-ray photoelectron spectroscopy, 135
XRD, XPS and SIMS investigations on electrodeposited nickel–phosphorous alloy coatings, 140

Zinc oxide
on exciton luminescence of ZnO/Al_2O_3 epitaxial thin films, 5
